Laboratory Exercise

cpe 357 Fall 2020

Due whenever, but before you turn anything else in, assuming you want it graded.

The Virtual Last Page

This lab is the virtual version of what would normally be the last page of my syllabus (you did read that, right?).

I really hate to do this, but want to be sure it's clear. I really have had people in the past tell me that I'd never told them that it wasn't ok to download someone else's work off github and turn it in. (In case it's unclear, it's not ok to download someone else's work off github and turn it in. Do your own work.)

Your task:

1. Read the syllabus. No, really, there's good stuff in it.

2. In a file called `lab00`, take a moment to write out what your goals and expectations are for cpe 357. Why are you taking this class other than that we're making you[1].

3. Below that, please copy the two boxed text segments from page 5 of the syllabus about academic dishonesty to be sure that everything's clear.

4. Finally, please read the pledge at the bottom of the last page of the syllabus, reproduced here:

> **Pledge**
> *I will do my own work in this class. That is, unless it is explicitly permitted by the assignment, I will neither use others' work as my own nor make my work available for others to use. I understand that either of these actions constitutes cheating sufficient to merit a grade of* F *for the course.*

At the bottom of your `lab00` file, either write "I agree", or, I suppose, "I intend to cheat" depending on your plans, but please don't choose the latter. Without this you will automatically receive a grade of zero for all assignments.

Now, let us never speak of this again.

Laboratory Exercises

What to turn in

Submit, via handin, to the `lab00` directory of the `pn-cs357` account on the CSL machines:

- Your file, named `lab00`, containing the items specified above.

---

[1]If that's it, so be it, but hopefully there's some curiosity involved.
